

Summer School in Applied Macroeconomics (SEEC2011)

Description

The Summer School in “Applied Macroeconomics” will be held at the Department of Economics and Quantitative Methods of the University of Salento (Lecce, Italy) from July 25 to July 29, 2011. The main aim of this 30 hours course is to provide an introduction to working with Matlab. The approach is problem based, i.e. students will be made familiar with the software using well-known examples from applied macroeconomics. The eight lectures will give an introduction to the examples and the required programming tools. In two tutorial sessions, students have the opportunity to consolidate the material from the lectures.

Lecturer

Prof. Dr. Ulrich Woitek

As preparation for the course, students are expected to work through Favero, C.A. *Applied Macroeconometrics*. Oxford University Press, 2001, Chapter 6, and DeJong, D. N./Dave, C. *Structural Macroeconometrics*. Princeton, Oxford: Princeton University Press, 2007, Chapter 2. A detailed handout including additional material not covered in the workshop will be provided.

Course Venue

The School is held at the Department of Economics and Quantitative Methods of the University of Salento (Lecce, Italy).

Selection Criteria

The number of participants cannot exceed 40; to be admitted, university education at the level of the Italian Laurea Magistrale or other foreign equivalent is requested. Another requisite is a good background in macroeconomics, calculus, statistics and econometrics. Undergraduates who have completed all of their exams are eligible by presenting a letter from

their advisor attesting the requested background. The lectures and the reading material will be in English. A scientific committee will select the participants, who will receive a written communication (email) by June 5, 2011. Selected participants will be asked to confirm their attendance by email.
